

## **Roku:**

Before setting up your Roku please find your device's wireless MAC address. If you already have the MAC address, then you can skip this video and register your device with the My Devices Portal. If you are unsure you can watch the video on registering a device with the portal. After your device is registered, connect to the UMassLowell network.

To find the MAC of a Roku streaming media device please follow these steps:

1. Once the Home screen appears click on settings.
2. Select the network option.
3. Select the about option.
4. Find the label "Wireless MAC address"
5. Write down the combination of letters and numbers exactly for reference later.

Once you have the MAC address of your Roku, as stated above; register it with the My Devices Portal. If you are unsure how to do this, please watch our video on registering a device.

Once you finish registration, connect to the UMassLowell network and finish wireless setup. Your Roku device is now set up to connect to our Wireless network.

We hope this PDF helped you better understand your options to connect your devices. For additional information please contact:
